

Decabromodiphenyl Ether (Deca-BDE) Compliance

June 11, 2008

Dear Customer:

Pericom products do not contain Decabromodiphenyl Ether (Deca-BDE) above limits as mentioned in the EU RoHS Directive 2002/95/EC.

The European Court of Justice has annulled the Decabromodiphenyl Ether (Deca-BDE) exemption to the EU RoHS Directive. The effective date of this European Court of Justice decision is July 1, 2008. As of that date, products containing Deca-BDE substances in excess of the RoHS Directive maximum concentration values must not be placed on the market in the European Union. This decision has no affect on Pericom products since Pericom products do not require nor have ever claimed Deca-BDE exemption to achieve compliance.
